[26-40] Answer the questions after reading the passage below.

26-27

But, in a large sense, we cannot dedicate — we cannot consecrate — we cannot hallow — this ground. The brave men, living and dead, who struggled here, have consecrated it far above our poor power to add or detract. The world will little note nor long remember what we say here, but it can never forget what they did here. It is for us, the living, rather, to be dedicated here to the unfinished work which they who fought here have thus far so nobly advanced. It is rather for us to be here dedicated to the great task remaining before us — that from these honored dead we take increased devotion to the cause for which they gave their last full measure of devotion; that we here highly resolve that these dead shall not have died ① _____; that this nation under God, shall have a new birth of freedom; and that government of the people, by the people, for the people, shall not ② _____ from the earth.

- Abraham Lincoln, Gettysburg, Pennsylvania, 1863

- ⑤ goods and services are exchanged

30-31

The first detective stories, written by Edgar Allan Poe and Sir Arthur Conan Doyle, emerged in the mid-nineteenth century, at a time when there was an enormous public interest in scientific progress. The newspapers of the day continually publicized the latest scientific discoveries, and scientists were acclaimed as the heroes of the age. Poe and Conan Doyle shared this fascination with the step-by-step, logical approach used by scientists in their experiments, and instilled in their detective heroes outstanding powers of scientific reasoning.

The character of Sherlock Holmes, for example, illustrates Conan Doyle's admiration for the scientific mind. In each case that Holmes investigates, he is able to use the most insubstantial evidence to track down his opponent. Using only his restless eye and ingenious reasoning powers, Holmes pieces together the identity of the villain from such unremarkable details as ① _____. In fact, Holmes's painstaking attention to detail often reminds the reader of Charles Darwin's *On the Origin of the Species*, published some twenty years earlier.

- ① Holmes's enemies left no traces at the crime scene.
- ② The character of Holmes was based on Charles Darwin.
- ③ The emergence of detective stories is related with people's fascination with science.
- ④ No real detectives would have been capable of solving Holmes's cases.
- ⑤ Doyle's contemporaries were all familiar with Darwin's work.

- ① alibis of the suspects
- ② the blood type of the victim
- ③ the fingerprint on the door knob
- ④ the kind of ink used in a handwritten letter
- ⑤ the testimony of an eyewitness

It is not often realized that women held a high place in southern European societies in the 10th and 11th centuries. As a wife, the woman was protected by the setting up of a dowry or decimum. Admittedly, the purpose of this was to protect her against the risk of desertion, but in reality its function in the social and family life of the time was much more important. The decimum was the wife's right to receive a tenth of all her husband's property. The wife had the right to withhold consent, in all the husband would make. And more than just a right: the documents show that she enjoyed a real power of decision, equal to that of her husband.

Women seemed perfectly prepared to defend their own inheritance against husbands who tried to exceed their rights, and on occasion they showed a fine fighting spirit. A case in point is that of Maria Vivas, a Catalan woman of Barcelona. Having agreed with her husband Miro to sell a field she had inherited, for the needs of the household, she insisted on ⑧____. None being offered, she succeeded in dragging her husband to the ⑨ ____ to have a contract duly drawn up assigning her a piece of land from Miro's personal inheritance.

- ① transactions - compensation
- ② treaties - negotiation
- ③ exchanges - enactment
- ④ dealings - settlement
- ⑤ auctions - indemnity

- ① The legal standing of the wife in marriage was higher than that of a single woman.
- ② The legal standing of the wife in marriage was lower than that of her husband.
- ③ The wife received one-tenth of her husband's land.
- ④ The husband could sell his wife's inheritance if his father-in-law agreed.
- ⑤ The wife had a powerful economic position.

① scribe ② tinker ③ mason
④ smith ⑤ forger

Most modern phenomenologists have recognized that self-reports may not reveal everything important about behavior and may not give a complete picture of personality. Persons may be conscious of the reasons for their behavior but be unable or unwilling to report them, for example, if they are uncomfortable or ashamed about aspects of their own feelings, perceptions, and behaviors. Or they may not be conscious of all of their experiences, in which case they cannot communicate them no matter how hard they try. Rather than considering that as a limitation, phenomenologists such as Rogers focus on the person's frame of reference as an important vantage point for understanding him or her.

The psychologist's task is to provide conditions that are ① _____ to growth and that facilitate free exploration of feelings and self in a therapeutic context. This is because one cannot expect people to be honest about themselves when they fear that their statements may incriminate them or lead to negative decisions about their future. In order to become more aware of and articulate private feeling, one needs an unthreatening atmosphere that reduces anxieties and inhibitions, and ② _____ self-disclosure. Phenomenologically oriented psychologists therefore try to create conditions of acceptance, warmth, and empathy in which the individual may feel more at ease for open self-exploration. These conditions of acceptance are illustrated vividly in "client-centered" therapy. Rogerians use the interview to observe how the individual interprets himself and his experiences, ③ _____ the validity of the data he provides.

- ① Self-reports reveal everything important about personality characteristics.
- ② Persons are conscious of all of their experiences.
- ③ Meditation is a method to enhance self-awareness.
- ④ Healthy personality is attained by concealing personal genuineness.
- ⑤ Psychologists use the interview to explore the person's self-concepts.

- ① concrete - encourages
- ② conductive - discourages
- ③ conducive - fosters
- ④ helpful - precludes
- ⑤ modal - daunts

① according to
② at the cost of
③ in spite of
④ regardless of
⑤ with respect to

Words, being but symbols by which people express their ideas, are an accurate measure of the range of their thoughts at any given time. Words obviously designate the things a culture knows, and just as obviously the vocabulary of a language must keep pace with the advance of the culture's knowledge. The date when a new word enters the language is in general the date when the object, experience, observation, or whatever it is that calls it forth has entered public consciousness. Thus with a work like the *Oxford English Dictionary (OED)*, which furnishes us with ① _____ quotations showing when the different meanings of every word have arisen and when new words first appear in the language, we could almost write the history of civilization merely from linguistic evidence.

38 What is the most appropriate title of the passage above?

- ① Changes of Meaning
- ② Dictionaries of New Words
- ③ Influences Affecting the Language
- ④ Language as a Mirror of Progress
- ⑤ Sources of New Words

39 Which best fits ①?

- ① dated ② exact ③ latest
- ④ unusual ⑤ written

40 Choose a statement that is not related to the content of the passage above.

- ① The Latin prefix pre- is used in such words as *prenatal*, *preschool*, *prehistoric*, and *preregistration*.
- ② The word *emancipation* and *abolitionist* have specific meanings connected with the Americans' efforts to abolish slavery in the Civil War.
- ③ About 1910, people began talking about the *futurist* and the *postimpressionist* art and the *Freudian* in psychology.
- ④ The 1972 supplement to the OED includes credit *card*, *ecosystem*, and *convenience foods*.
- ⑤ At the turn of the twentieth century, we get the word *questionnaire*.

[41-50] Select the most appropriate word from the box below. A word can be used only once.

- | | | | |
