In vitro fertilization does not contribute to developmental delays up to age 3, according to a new study. As many couples who use IVF to have children are older, for example, other factors can affect fetal development. The study showed that developmental delays were not more prevalent among children conceived through IVF. The new study also said children conceived through IVF were not at greater risk with full-blown developmental disabilities such as learning disabilities, speech or language disorders, or autism. The researchers found no significant difference between IVF and non-treatment groups of children with developmental delays - 13 percent of children conceived with IVF had a delay, while 18 percent of those not conceived with treatment had a delay.

26

- ① IVF is not one of the factors in neonatal developmental delays.
- 2) The IVF industry has been disrupted by parental perturbations.
- ③ IVF is not more precarious than other factors for fetal development.
- 4 The age of parents can be germane to the health of their child.

[Questions 27-28] Reorder the following sentences to form the most coherent passages.

- A While he was tamping down the charge with an iron rod, it went off and sent the rod through his head.
- B But contemporaries thought that his personality had changed; whereas once he had been well-behaved, now he was downright antisocial.
- © About a century and a half ago, an American railway worker named Phineas Gage was setting an explosive charge near Cavendish, Vermont.

27

- ① C B A D
- 2 C D B A
- 3 C A D B
- 4 C D A B
- A Such chains tend to intertwine in a disorderly fashion when part of a solid.
- B Polymers are long, chainlike molecules; each link in the chain is either an identical chemical unit (as in the case of polyethylene) or one of a small set of such units (as in the case of nylon, which has two sorts of link).
- C Strength, however, requires order.
- D To make a strong material the individual molecules should, as far as possible, be stretched out in parallel with one another, thus forming an elongated crystal, and the crystals should then be similarly aligned in a fiber as that fiber is being drawn.

28

- ① D A C B
- 2 D C A B
- 3 B C D A
- 4 B A C D

[29-30] Select the statement most consistent with each passage below.

For years, the motor industry lived by the mantra, "bigger is better." The number of liters that a car's pistons displaced within its engine's cylinders was a matter of pride for its owner. This was because displacement equaled power, and power equaled - well, whatever it was that the owner wanted to show off beyond the mere ability to travel from A to B. Times change, though, and technology moves on. Power is no less in demand than it was, but as the clamor for fuel economy rises, raw displacement, which sucks fuel from a tank like an enthusiastic child with a straw and a bottle of pop, is going out of fashion. Instead, a new mantra is taking over. This is, "small is beautiful." What tickles today's motor heads, therefore, is not so much how many liters an engine displaces as how much horsepower it can extract from a given volume. For, even as they get more powerful, car motors are shrinking.

20

- ① Fuel economy has usurped power in the motor industry as a point of pride.
- ② Internal-combustion engines are getting smaller and more efficient.
- 3 Motor heads now care more about engine displacement than volume.
- 4 Smaller cars put beauty before power.

Many suspect governments of protecting increasingly wrinkly electorates over the young within the big austerity packages imposed since the financial crisis and recession. While youths have had a particularly rough ride within labor markets, the overall effects of the response to the crisis are more complicated. A new issue of *Fiscal Studies* compares the austerity packages implemented in six European countries and would seem to provide fodder for those who think the young have been given a raw deal.

30

- ① Europe is suffering from a catastrophic electoral crisis.
- ② A recent study confirms suspicions that youths have benefited disproportionately from European fiscal austerity.
- ③ Recent research suggests that young people have been gypped by fiscal austerity in Europe.
- Recent increases in government spending have favored the elderly over the young.

31-33

Mr. Makari's highly engaging story begins with René Descartes. Ever since Greek philosophy had merged with Christianity, the soul had been regarded as the "unifying link between nature, man and God," Mr. Makari writes. By the 17th century, however, Christendom was in crisis, and many found it hard to reconcile the notion of an incorporeal soul with a mechanical world that was increasingly understood as made up of matter. Descartes tried to satisfy the demand of skeptical naturalists by narrowing the concept of the soul to a "thing that thinks," yet that was separate from the body. The French philosopher thus breathed new life into the Christian belief in an immortal soul. At the other end of the 🛽 stood Thomas Hobbes, who thought there was no such thing as "immaterial substance." In his view the soul, rather than being rational and Godlike, was "material, prone to illness and errors." B______. And they were to demonstrate the importance of Mr. Makari's narrative as more than just an intellectual exercise. After Hobbes concluded that men were controlled by animal feelings that inevitably produced conflict, his proposed solution was to hand over power to an absolute monarch.

- 31 Select the statement most consistent with the passage.
- ① European philosophy became increasingly religious in the seventeenth century.
- ② Mr. Makari charts the rise of modern secular philosophy.
- ③ Hobbes advocated modern forms of demagoguery based on humans' tendency to "illness and errors."
- ④ Descartes emphasized the insignificance of the mechanical world.
- 32 Choose the best sentence that fits blank ® above.
- ① Hobbes's views were consistent with those of Descartes but extrapolated them one step further
- ② Hobbes corroborated Descartes's ideas by translating his notion of the immaculate soul into material terms
- The disparate views on the nature of the "thing that thinks" were to have monumental implications
- Rather than "I think, therefore I am," Hobbes famously posited, "I think, therefore I am," but "I am, therefore I think, too"
- 33 Choose the best word for blank A above.
- ① diaspora

② bulwark

③ obscurity

4 gamut

34-36

Years form now, historians will likely look back at this period in American history as one of heightened prejudice amongst a significant portion of the public and shortsightedness amongst many political leaders. A The consensus among serious observers of the Middle East is that the reasons for (A) in the region towards the United States are multifold, having to do with: the United States' unconditional support of Israel and its expansionary and oppressive policies against the Palestinians; propping up of a host of unrepresentative, corrupt and repressive dictatorships throughout the Middle East and North Africa; and widespread military intervention in the Muslim world, from drone attacks that have claimed tens of thousands of civilian lives to whole-scale invasions that have cost the lives of hundreds of thousands of Muslims. B Nearly 80 percent of the people living under the Palestinian Authority and Hamas qualify America as an "enemy." C Polls show that 7 of the top 10 countries that view the United States most unfavorably are Muslim countries, while only 1 of the top 10 countries that view America most favorably is Muslim. D

- 34 Choose the best word for blank (A) above.
- ① redolence

2 comity

3 animosity

- ④ rapprochement
- 35 Choose the best location for the following statement.
- "About 85 percent of Egyptians and Jordanians and 73 percent of Turks, all key U.S. allies in the Middle East, have an analogous opinion."

1 A

② B

3 C

- 4 D
- 36 Select the statement most consistent with the passage.
- ① The antipathy between the U.S. and the Middle East is expected to decrease in the near future.
- 2 Muslim countries have a pejorative feeling towards the U.S.
- 3 The U.S. lacks a strong confederate in the Middle East.
- ④ America's asymmetrical interference in the Middle East is one of the causes of stridency in the region.

40 Choose the best words for blanks ® and © above.

- $\ensuremath{\text{\textcircled{1}}}$ $\ensuremath{\text{\textcircled{B}}}$ cull $\ensuremath{\mathbb{C}}$ ready-made
- ② ® rile up © protean
- 3 B foment © excremental
- 4 B prod C nascent

It makes little sense to imagine the scene of culture as one that one might enter to find bits and pieces of evidence that show an Aabiding faith in an already established notion of universality. If one were to enter various domains of culture in order to find examples of word citizens, one would <code>B_____</code> from those various examples the selfsame lesson, the selfsame universal bearing. But is the relation between culture and the universal appropriately construed as that between an example and the moral dictum it is said to support? In such cases, the examples are subordinate to the universal, and they all indicate the universal in the same way. The future articulation of the universal, however, can happen only if we find ways to effect cultural translations between those various cultural examples in order to see which versions of the universal are proposed, on what exclusions they are based, and how the entry of the excluded into the domain of the universal requires a radical transformation in our thinking of universality. When competing claims to the universal are made, it seems imperative not to presume that the cultural moments at issue exemplify a(n) © universal. The claim is part of the ongoing cultural articulation of universality, and the complex process of learning how to read that claim is not something any of us can do outside of the difficult process of cultural translation. This translation will not be an easy one in which we reduce every cultural instance to a presupposed universality, not will it be the enumeration of radical particularism between which no communication is possible.

- ① staunch ② coruscating
- 3 subsiding
 4 appending
- 38 How does the author define the "universal"?
- ① a religious belief that opposes modern androcentric culture
- ② a perennial truth that can only be discovered through numerous cultural translations
- 3 an ideology to be debunked
- $\ensuremath{\mathfrak{A}}$ an ongoing approximation of perspectives in a single articulation
- 39 According to the author, why are cultural translations important for the future expression of the universal?
- ① It is central to the articulation of a multicultural society based on mutual respect for one another.
- ② It is needed to recognize and incorporate excluded aspects into better approximations of the universal.
- ③ It is essential for actualizing timeless truths that can only be articulated through cultural comparisons.
- An abiding faith should be reinforced by adopting a universal truth that reflects all cultures.
