- 각 문항별로 배점이 상이하므로 유의하시기 바랍니다.
- 답안지에 성명, 수험생 지원 모집단위, 수험번호, 문제 유형(A형/B형)을 정확하게 기재 또는 마킹 하십시오.
 - (1) OMR 답안지에 수험생이 직접 쓰는 ① 성명, ② 지원모집단위, ③ 수험번호
 - 반드시 **흑색 볼펜** 또는 **컴퓨터용 사인펜**만 사용하여 기재 (연필, 샤프, 색깔 볼펜 등 사용 불가)
 - (2) OMR 답안지 상의 ① 수험번호 숫자 마킹란, ② 문제유형(A형/B형), ③ 답안 표기란
 - 반드시 **컴퓨터용 사인펜**만 사용하여 마킹
 - (3) 컴퓨터용 사인펜과 흑색 볼펜을 개인 지참하여 사용 가능
 - (4) 수정테이프(수정액 사용 불가)를 사용하여 답안 수정 가능
- 답안지 작성 시 **아래의 경우를 유의**하시기 바랍니다.
 - (1) 답안지 전체 0점 처리
 - 문제지 유형(A형/B형)을 마킹하지 않은 경우
 - OMR 답안지에 마킹하는 것 이외에 불필요한 표시 및 낙서를 하거나 답안과 무관한 서술을 기입한 경우
 - 본인 신분을 나타낼 수 있는 표현 및 표시를 하는 경우
 - (2) 해당 문항 0점 처리
 - 컴퓨터용 사인펜 이외의 필기구로 답안을 마킹하거나 바른 방법으로 표기하지 않아 전산에 인식되지 않은 경우
 - 답안을 중복하여 마킹한 경우
 - 수정테이프가 답안지에서 떨어지는 등 불완전한 수정처리로 인해 답안이 중복처리 될 경우

11. The length of the day and year is based on the movement of the earth, but the movement of the earth is unpredictable. Because the earth rotates irregularly and actually wobbles on its axis, it eventually gets out of _____ with time. To overcome this problem, a system using space technology was devised to measure changes in the earth's rotation and speed. Evolving from this system is the use of leap seconds that are added or subtracted to keep time accurately.

- ① orbit ② movement ③ control
④ balance ⑤ synchronization

12. One of the brain's primary jobs is to produce _____ so we can use them to make predictions about the world and then base our behavior on those predictions. For one thing, when a cook adds chopped onions, mushrooms, and garlic to a spaghetti sauce, he has a picture of how the sauce will taste and measures each ingredients according to that picture. And when an artist creates a painting, he has a mental picture of the finished piece.

- ① books ② images ③ recipes
④ disorders ⑤ photos

The December night was chilly and damp, and the two middle-aged women turned up the car heater as they drove along the (A)_____ Texas road. It was soon after Christmas, 1980. The women and the small boy with them had travelled to a town about fifteen miles from Houston for dinner; now, as they made their way home, the child noticed something strange in the sky. A (B)_____ light was gliding toward them over the pines.

Many reports show that there are still very few women in high government positions. (A)_____, only about 15% of the positions in government are held by women. In addition, more than half of the people who can't read and write are women. Being illiterate doesn't mean people are not intelligent. However, not being able to read and write does make it more difficult for people to change their lives. There are many programs to help people improve their farming skills. (B)_____, for years, these programs provided money and training for men but not for women. Now this is changing. International organizations and programs are helping women, as well as men, improve their agricultural productions.

Amphibians are at risk due to habitat destruction. Most amphibians live in wetlands. Wetlands provided a (A)crucial service by filtering pollutants out of water, and providing food and shelter for (B)young fish and amphibians. But (C)underdevelopment of the land has caused the destruction of amphibian habitats and, as a result, (D)reduced their populations. Once a species is gone, it is gone forever. When this happens, we all are poorer—the world is (E)less diverse, a gene pool that might be useful is gone.

For government policy to assume that young women can (A)rely on others for financial support is dangerous. Firstly, some young women do not receive support from their families, either because they are not in contact with them or because their families cannot, or do not want to, (B)support them financially. Secondly, living in the same house as a partner or family member does not mean that a young woman is receiving her fair share of the household's resources. Women's (C)lower contribution to the household's income can mean that they receive less money for themselves and consume fewer household resources, which can lead to poverty. Thirdly, financial dependence means a young woman is always at risk of experiencing (D)wealth if support is withdrawn or a relationship ends. Young women need an adequate (E)income of their own from work or the social security system. Many of the most vulnerable young women are not in work or able to access work easily.

17. Although only a small percentage of the electromagnetic radiation that is emitted by the Sun is ultraviolet (UV) radiation, the amount that is emitted would be enough (A)to cause severe damage to most forms of life on earth (B)were it all to reach the surface of the earth. Fortunately, all of the Sun's ultraviolet radiation does not reach the earth (C)because of a layer of oxygen, called the ozone layer, (D)encircling the earth in the stratosphere at an altitude of about 15 miles above the earth. The ozone layer absorbs much of the Sun's ultraviolet radiation and prevents it (E)to reach the earth.

18. The locations of stars in the sky (A)relating to one another do not appear to the naked eye to change, and as a result stars are often considered (B)to be fixed in position. Many unaware stargazers falsely assume that each star has (C)its own permanent home in the nighttime sky. In reality, though, stars are always (D)moving, but because of the tremendous distances between stars themselves and (E)from stars to Earth, the changes are barely perceptible here.

19. The remote control device became popular during the 1980's, and it has had a significant impact on the manner (A)which people experience television. Industry researchers quickly began (B)to observe new viewing patterns that they described as "grazing." Many viewers used the remote control to avoid (C)watching commercials, while others learned to scan restlessly through the channels, not watching entire programs, but looking for an arresting image or sound that entices them (D)to stop on a particular channel. As one result, many cable networks crafted a signature visual style, using distinctive logos, graphic designs, and other techniques, (E)that made the network immediately identifiable to the restless, remote-control-enhanced television viewer.

20. We always need to ask ourselves, and (A)reflect very carefully about, what we want and why we want it. Knowledge appears to be a good thing, but too much knowledge, or perhaps (B)pursued that knowledge with too much determination, may very well make our lives pretty miserable. One reason for this is that chasing knowledge beyond certain limits might be (C)nothing but a fool's errand. We are somehow assuming that we can know everything, that our minds are powerful enough. But why should we assume that? We are ourselves (D)a work of nature, and if nature is powerful enough to create something that is capable of understanding all its workings, then it must also be powerful enough to conceal things from us. There is no guarantee, and in fact it is very unlikely, (E)that we are actually capable of understanding more than a tiny fraction of the universe.

21. It seems rather improbable that a celestial body (A)the size of the Moon could completely block out the tremendously immense Sun, (B)as happens during a total eclipse, but this is exactly (C)that happens. Although the Moon is considerably smaller in size than the Sun, the Moon is able to cover the Sun because of (D)their relative distances from Earth. A total eclipse can last up to 7 minutes, during (E)which time the Moon's shadow moves across Earth at a rate of about .6 kilometers per second.

He wanted to see if the monkey could use the boxes and the stick to get the banana.

We all know that monkeys are smart animals, but sometimes their intelligence is surprising and entertaining. (A) A psychologist once wanted to see just how smart a monkey was. (B) He hung a banana high up in a monkey's cage and placed several large boxes and a stick nearby. (C) The monkey looked at the banana, the boxes, and the stick. (D) Then it took the psychologist's hand and led him to where the banana was hanging. (E) It jumped up onto his shoulders and reached the banana from there.

But the rest of the pack helps to look after them.

Gray wolves are social animals choosing to live together in families, or "packs," of usually eight members. They establish a clear line of authority. (A) There is always a dominant head male who makes the decisions. (B) There is a head female who takes charge of the pups, the other females, and sometimes the weaker males. (C) Usually, only the head male and female have pups. (D) They are born in the spring, the number varying from one to as many as eleven pups. (E) The mother feeds her little ones from her own milk. Later, the other pack members help to feed them by chewing and swallowing the food, then bringing it up.

It is clear from a world-wide opinion survey that young people today are very much concerned about their (A)physical / psychological appearance. This issue appears to be even more important to them than health. Results show that the perception of health has gradually moved away from the traditional concept of (B)absence / presence of major illnesses. Now health is perceived in terms of fitness or slimness. According to the opinions of the respondents in the survey, a new definition of health should include physical appearance, a positive state of wellbeing (feeling well and healthy) and improved endurance and energy. However, the findings of the survey and the concern for physical appearance and skin care over exercise and eating habits among young people has many (C)amplifications / implications for health-care education.

"Symptoms and signs" in Oriental Medicine have a rather different meaning than in Western Medicine. They are different from the relatively (A)wide / narrow area explored by Western Medicine despite its battery of clinical tests. Instead, the doctor of Oriental Medicine widens his or her view to assess changes in a broad range of common (B)emotional / bodily functions such as urination, sweating, thirst and so on. Furthermore, the doctor of Oriental Medicine takes into account many clinical manifestation ranging from certain facial and bodily signs to psychological and emotional traits which are not really "symptoms" or "signs" as such, but rather expressions of a certain (C)harmony / disharmony.

26. Cranberry에 관한 다음 글의 내용과 일치하지 않는 것은?

The cranberry is a North American fruit that grows on a bush. The settlers from England in the 1600s liked the berries and called them "crane berries" because birds called cranes ate them. The cranberry bush does not grow everywhere in the United States. In fact, it grows in only five states. These states have the special conditions that the cranberry bush needs. Cranberries ripen when the weather starts to become cold. We see cranberries in the stores in the fall. Cranberry growers separate the best cranberries from all the rest. It's hard to recognize the best cranberries just by looking. So cranberry growers use a special method. They use a seven-step test to separate berries. The best cranberries are the ones that bounce down seven steps!

Human beings can eat many different kinds of food, but some people choose not to eat meat. Vegetarians often have more in common than just their diet. Their personalities might be similar, too.

- (A) They are competitive and good at business. They are also usually in a hurry. Many fast-food eaters might not agree with this description of their personalities, but it is a common picture of them.
- (B) For example, vegetarians in the United States and Canada may be creative people, and they might not enjoy competitive sports or jobs. They worry about the health of the world, and they are probably strongly opposed to war.
- (C) Some people eat mostly fast food. One study shows that many fast food eaters have a lot in common with one another, but they are very different from vegetarians.

28. 다음 글의 주제로 가장 적절한 것은?

As adults, many of us have difficulty acknowledging our anger, even when it is fully justified. We may swallow our anger and ignore other feelings because we learned when we were very young that we were unacceptable when we had such feelings. As children we might have shouted at our parents: "I hate you! I never want to see you again!" Then we may have heard an upset parent reply: "How dare you say such a thing - after all I've done for you! I don't ever want to hear that from you again!" We soon take these messages to mean, "Don't be angry! Never be angry with those you love! Keep control of yourself!" And we do just that, keeping many of our feelings to ourselves, stuffing them in the pit of our stomach and pretending we do not experience them. It is not surprising that so many people suffer from migraine headaches, peptic ulcers, hypertension, and heart disease.

Here are a few interesting points about the brain and learning. A key idea behind exercise is getting the right amount of oxygen to the brain. This can also be done through breathing exercises. Just taking the time to breathe deeply and slowly for a few minutes before taking a test or before starting homework can have a positive impact on concentration and motivation. This is why it's often a good idea to have your child get some exercise before leaping into homework. Chewing gum is another way to exercise your brain. Studies also show that like exercise, chewing _____ (A) _____ blood circulation in the brain, _____ (B) _____ memory, and _____ (C) _____ anxiety - as long as the gum doesn't contain a high percentage of sugar. For this reason, some kids with attention issues are given an accommodation to chew gum during school.

Demarketing in a tourism context is the process of discouraging all or certain tourists from visiting a particular destination. General demarketing occurs when all visitors are temporarily discouraged from visiting a location, usually due to perceived carrying capacity problems. A notable example is Venice, where intensive summer crowding occasionally prompts local authorities to run ads depicting unpleasant scenes of litter, polluted water, dead pigeons and the like. The assumption is that the brand image of Venice is so strong that such imagery will not cause any permanent damage to the tourism industry. Most other destinations, however, do not have such a powerful brand and hence are generally reluctant to countermand brand-building efforts with demarketing.

Why don't we "think something different" more often? There are several main reasons. The first is that we don't need to be creative for most of what we do. (A)For example, we don't need to be creative when we're driving on the freeway, or riding in an elevator, or waiting in line at a grocery store. (B)We are creatures of habit when it comes to the business of living—from doing paperwork to tying our shoes. For most of our activities, these routines are indispensable. Without them, our lives would be in chaos, and we wouldn't get much accomplished. (C)If you got up this morning and started contemplating the bristles on your toothbrush or questioning the meaning of toast, you probably wouldn't make it to work. (D)These attitudes are necessary for most of what we do, but they can get in the way when we're trying to be creative. (E)Staying on routine thought paths enables us to do the many things we need to do without having to think about them.

Some British people are worried about the increasing influence of American English on British English. Both written and spoken British English are today more aggressive and direct. But one development which most people welcome is the campaign to replace the difficult and obscure language used on official forms with plain English. Britain has no language academy to set and enforce standards, though recently there have been calls for one to be set up. Others argue that rules laid down by such an organization would hinder the natural development of the language and would in any case probably be resisted by the public.

While European artists had developed a tradition of working in a realistic style, other cultures had a long tradition of abstract art forms. Some native American artists also work in an abstract style. Navajo Indian artists make abstract paintings that don't use oil paints, watercolors, or any kind of wet materials. Their artworks are called sand paintings because the artist's materials are crushed charcoal, cornmeal, crushed rocks, and sand. The artist makes a sand painting by pouring these materials onto the ground according to one of hundreds of traditional designs. It is a delicate task to make this kind of artwork because, as you can imagine, once the materials are poured it is very hard to correct _____.

When Steve Jobs was in the eighth grade he decided to make a frequency counter. Lacking the proper parts, the bold twelve-year old opened the phone book and dialed one of his heroes, Hewlett-Packard CEO Bill Hewlett. Hewlett answered the phone and, amazingly, chatted with Jobs for twenty minutes about his school project. By the end of the call, Hewlett agreed to provide the parts Jobs needed and later offered Jobs a summer job at HP, on the frequency counter assembly line! The thing to remember about Steve Jobs, Bill Hewlett, and most other successful people is that _____. In fact, most successful people see it as their responsibility and privilege to help the next generation of entrepreneurs, leaders, and innovators in their journey. So if you have access to someone you admire, be bold. Politely ask for thirty minutes of their time, no matter how "big time" they are, and you might be surprised at the response you receive.

35. 위 글의 빈 칸에 들어갈 말로 가장 적절한 것은?
