[31-40] Read the following passages and choose the one best answer for each question.

[31-33] 139 words

Despite their reputation for opposing the development of alternative energy sources, oil companies were early adopters of solar energy technology. In the 1970s, for example, one major American oil company installed this technology on its off-shore oil rigs. For safety reasons, these rigs were required by federal law to have bright lights. On most rigs, these lights were powered by batteries that needed to be replaced frequently and at great expense. The used batteries also often ended up in the sea, creating an environmental liability for rig operators. Seeking a better way of illuminating their rigs, the oil company turned to solar panels, which had been pioneered by government space agencies decades earlier. The company's efforts represented one of the earliest commercial applications of solar power and a significant step toward bringing down the cost of generating such power.

31 Which of the following is closest in meaning to the underlined phrase bringing down? [3점]

① avoiding ② damaging ③ reducing ④ delivering

32 According to the passage, what did the oil company use solar energy for? [3점]

① To provide backup power for its oil rigs
② To transport the oil produced by its oil rigs
③ To illuminate the sea floor during oil exploration
④ To maintain a consistent power supply for the lights on its oil rigs

33 What can be inferred from the passage? [3점]

① Space flight engineers commercialized solar panels.
② The lights on off-shore oil rigs were normally fueled mainly by oil.
③ Off-shore oil rig workers threw spent batteries into the sea.
④ Solar panels were found to function poorly off shore.

The cone snail is an ocean-dwelling creature that hunts fish using its powerful venom. Because it is slow moving, it relies on a spearlike object on its head to strike its prey and inject its venom from a distance. This venom incapacitates fish, which allows the cone snail to capture and consume them. Except in the case of relatively large specimens, cone snails do not generally deliver a sting powerful enough to kill humans. Ⓐ_____, their venom can produce swelling, muscle paralysis, and breathing problems. Another effect of the venom is localized numbness, which keeps prey from realizing that it has been struck by the cone snail. Using the chemical compounds that mimic this effect, scientists have created a drug that reduces sensitivity to pain. This drug has been approved by the US Food and Drug Administration for medical use.

34 Which of the following is most appropriate for blank Ⓐ? [3점]

① Finally ② Therefore ③ Still ④ Moreover

35 Which of the following is correct about cone snails? [3점]

① They inject venom by biting prey with their sharp teeth.
② They grab onto their prey before injecting their venom.
③ Their venom is almost always fatal to humans.
④ Their victims may remain unaware of having been stung.

36 What is the medicine developed from cone snail venom designed to do? [3점]

① Dull pain ② Relax muscles
③ Lessen numbness ④ Improve breathing

The British artist J. M. W. Turner is reputed to have gone to incredible lengths to capture the essence of nature. According to one story, he was so bent on experiencing the natural world depicted in his paintings that he once tied himself to the mast of a ship during a ferocious storm. Afterwards, it is said, he drew on his ordeal to create one of his masterpieces, Snow Storm (1842). While most experts dismiss the anecdote about Turner being tied to the mast as a Ⓐ_____, they acknowledge that he did have first-hand knowledge of the storm in question. Turner himself was eager for the world to know that he had witnessed the storm that he later depicted. In fact, he gave the painting an outlandishly detailed title (usually abbreviated) emphasizing the fact that he had been aboard the ship during the storm. When Snow Storm was unveiled, it was rapturously received by John Ruskin, one of the Victorian era's foremost art critics. However, few others shared Ruskin's sentiments toward Turner's painting. Despite the frostiness of this initial reaction, Snow Storm has gone on to become an iconic example of British Romantic painting. Inspired by the story of its genesis, a major figure in modern British art even reenacted Turner's legendary ordeal, which the modern artist likened to Christ's crucifixion.

37 Which of the following is most appropriate for blank Ⓐ? [3점]

① fabrication ② calamity ③ torment ④ disappointment

38 Which of the following is closest in meaning to the underlined word outlandishly? [3점]

① deceptively ② methodically ③ absurdly ④ gracefully

39 Why did Turner allegedly tie himself to a ship's mast? [3점]

① To reenact the ordeal of an earlier British artist
② To gain direct observations of powerful natural phenomena
③ To be able to continue working on a painting during a storm
④ To make a symbolic point about Jesus Christ's crucifixion

40 Which is correct about Turner's painting Snow Storm? [3점]

① It was not actually a painting of a snow storm.
② It was given an unusually long title by the artist.
③ It was dismissed by the influential John Ruskin.
④ It was largely well received by the era's critics.
