[01-50] Read the following passages and answer the questions.

[01-03] 146 words

Thousands of years ago, people used ancient types of wheat and other grains to make flat bread on the hot rocks of their campfires. At some point in time, early cooks started putting other kinds of food on the bread — using the bread as a plate. It was the world's first Ⓐ_____ crust!

Over time, Ⓐ_____ began to look more like the food we know today. When European explorers arrived in the Americas, they saw Native American people eating tomatoes. When they brought Ⓑ them back to Europe, however, people there wouldn't eat Ⓒ them. They thought eating tomatoes could make Ⓓ them ill.

Slowly, however, Europeans discovered that tomatoes were delicious and safe to eat. Cooks in Naples, an Italian city, began putting Ⓔ them on their flat bread. The world's first true Ⓐ_____ shop opened in Naples in 1830. People there ate Ⓐ_____ for lunch and dinner. They even ate it for breakfast!

01 Choose the best word for Ⓐ. [1.5점]

① hamburger ② pizza ③ pasta ④ sandwich

02 Which one is TRUE about the food introduced above? [2점]

① It was first introduced to Native Americans.
② It was first invented by Native Americans.
③ Tomatoes began to be added only after Europeans came to Americas.
④ People in Naples preferred it for breakfast.

03 Which refers to a different one? [1.5점]

① Ⓑ ② Ⓒ ③ Ⓓ ④ Ⓔ

[04-06] 157 words

A major change to revitalize the native language of New Zealand has been occurring after concerns it would die out. In 2013, only 3.7 percent of locals said they could speak the native tongue, Maori. Maori became an official language alongside English in 1987, and deaf individuals became elated when sign language became its third official language in 2006. The New Zealand government has promised to have Maori taught in every school in the country by 2025 to meet its goal of 20 percent of the country speaking the language by 2040. So far it has been a grass roots revival. Locals have started using the greeting kia ora (hello) or ending an email with ngamihi (thanks). Popular culture embraced the trend last year with the Disney film, Moana having a special one-day Maori-language screening. Maori is also being taught to residents of a few retirement villages. And Prime Minister Jacinda Ardern has pledged that her baby daughter will learn both Maori and English.

04 Which one is NOT TRUE? [2점]

① Maori is an official language of New Zealand.
② There are only two official languages of New Zealand.
③ Maori is taught in a few retirement villages.
④ Ardern will have her daughter learn Maori and English.

05 Which one can be inferred from the passage? [2점]

① Sign language is more essential than Maori.
② Sign language is used in the film, Moana.
③ The Maori language has seen a resurgence from the local level.
④ Popular culture has yet to accept Maori.

06 Choose the best title. [2점]

① The Decline of Maori
② The History of New Zealand
③ The Inspiration of Moana
④ The Increasing Popularity of Maori

[07-10] 240 words

Egypt has recovered a stolen ancient artifact that was listed for sale at a London auction house, the country's Ministry of Antiquities has confirmed. The section of tablet — engraved with the cartouche, or royal symbol, of King Amenhotep I — was stolen from the Karnak Open Air Museum in Luxor, Egypt, in 1988. It was smuggled out of the country, and ultimately put up for auction in London.

Raed Khoury, director of repatriation at the Ministry of Antiquities, said that the organization worked to track down the stolen relief. They monitored the websites of international auction houses before eventually finding the artifact for sale in the UK. The ancient tablet was subsequently removed from sale and delivered to the London embassy. The ministry officially announced its return to Egypt on January 4.

The tablet's recovery comes as a dispute brews around another ancient Egyptian artifact: a casing stone from the Great Pyramid of Giza. This block of limestone will go on display at the National Museum of Scotland in Edinburgh from February. However, Egypt's Ministry of Antiquities has contested the legitimacy of the stone's Ⓐ_____, asking the museum Ⓑ_____. The museum says the stone was extracted from Giza in the 19th century by engineer Waynman Dixon and given to Scotland's Astronomer Royal, Charles Smyth, who kept it in his Edinburgh home. If it transpires that the stone was Ⓒ_____ removed from Egypt, Khoury said, the ministry will take "all the necessary steps" to bring it back.

07 Choose the best topic. [2점]

① The history of the Ministry of Antiquities of Egypt
② The wonder of King Amenhotep I's cartouche
③ The oncoming exhibition of the National Museum of Scotland
④ Egypt's attempt to retrieve stolen ancient artifacts

08 Choose the best word for Ⓐ and Ⓒ. [2.5점]

① export — illegally
② imposter — illegally
③ export — lawfully
④ imposter — lawfully

09 Which one is NOT TRUE? [2점]

① Raed Khoury is an Egyptian government official.
② Charles Smyth is actually a smuggler.
③ Waynman Dixon brought the artifact from Egypt.
④ The Ministry of Antiquities of Egypt has closely watched the international auctions.

10 Choose the best expression for Ⓑ. [2점]

① to lower the price
② to prove its creativity
③ to stop the bidding
④ to produce documents of ownership

[11-13] 172 words

Ⓐ How can you stop these tiny invaders from making you sick? Your skin is the first defense against germs. One of the easiest ways to prevent some illnesses is simply by washing with soap and water. But germs can still enter the body through small cuts in the skin or through the mouth, eyes, and nose.

Ⓑ There are two types of germs: viruses and bacteria. Viruses use the cells inside animals or plants to live and multiply. Viruses cause illnesses such as influenza, or the flu. Bacteria are tiny creatures. Some bacteria are good. They can help your stomach digest food. Other bacteria aren't as good. They can cause sore throats and ear infections.

Ⓒ A germ is a bit of living matter capable of growth and development into an organism. Germs can cause many problems, including disease. The germs that make people sick are everywhere. You can't see them, but they're there. They're sitting on your desk. They're hiding on your computer's keyboard. They're even in the air that you are breathing.

11 Which one is the right order? [2점]

① Ⓑ — Ⓒ — Ⓐ ② Ⓑ — Ⓐ — Ⓒ ③ Ⓒ — Ⓑ — Ⓐ ④ Ⓒ — Ⓐ — Ⓑ

12 Which one is TRUE? [2.5점]

① Germs are too small to see with our own eyes.
② Some viruses can have a positive impact on a human body.
③ Bacteria can cause illnesses such as influenza, or the flu.
④ Bacteria can grow and multiply only in living cells.

13 Choose the best title. [2점]

① How to Protect your Skin ② Skin, the First Line of Defense
③ Tiny Invaders ④ Germ Industry

[14-16] 198 words

Like other industries in 2008, plastic surgery suffered a drop in revenues when the recession began to worsen. Recently, however, people have begun investing in cosmetic surgery to increase their value in the job market. For example, 56-year-old Max Seddon is aware that the weakening music industry will likely force him to begin seeking work elsewhere. He spent $17,000 on a facelift to make his appearance more youthful and to bolster his confidence when he goes job-hunting. Other middle-aged men and women have found it necessary to turn to cosmetic surgery because they are competing with younger job applicants who look young and fresh.

Plastic surgeons have noted that people now have cosmetic surgery Ⓐ_____ not just so they can enjoy life more, but also because they know skills are often not enough in a competitive job market. Surgeons are now offering cheaper face-lifts that use only local anesthesia to Ⓑ_____ the price and the recovery time. A plastic surgeon in Manhattan has considered the fact that the older yet more qualified people Ⓒ are being passed over for their younger, better-looking counterparts and has offered a "job-fighter package" that makes use of cosmetic surgery methods that are less invasive and much cheaper.

14 Which one is NOT TRUE? [2점]

① The economy was very bad in 2008.
② Max Seddon has worked for a music company.
③ Max Seddon had cosmetic surgery to make his appearance more youthful.
④ Middle-aged people now have cosmetic surgery mainly to prolong their life.

15 Choose the best word for Ⓐ and Ⓑ. [2.5점]

① do — increase ② do — reduce ③ done — increase ④ done — reduce

16 Which one can best replace Ⓒ are being passed over for? [1.5점]

① are being preferred to ② are being less preferred to
③ are getting closer to ④ are getting less close to

[17-19] 209 words

Legend and history mix in the story of India's Taj Mahal, one of the world's most beautiful buildings. In 1631, Mumtaz Mahal, the beloved third wife of Mughal emperor Shah Jahan, died giving birth to their 14th child. When the emperor emerged from mourning, he started to build a great tomb for her: the Taj Mahal.

From 1632 to 1653, the white marble mausoleum arose on the banks of the Yamuna River in Agra. Twenty thousand artisans working under a team of architects assembled the symmetrical domed building and gardens. It is a masterpiece of careful construction; for instance, the tall towers that flank the central building lean outward slightly but appear to be upright in a feat of Ⓐ_____.

Stories arose that afterward, the building's artisans had their hands struck off and their eyes gouged out so that they would never be able to raise a rival building. Yet another tale says that the brooding emperor built a dark mirror of the tomb, the Black Taj, on the opposite bank of the Yamuna. Neither of these stories has been substantiated. What is true is that the emperor spent his last years imprisoned by his own son in Agra Fort, from which he could gaze upon the Taj but never enter it again.

17 Which one is TRUE? [2점]

① The Taj Mahal is a tomb of an emperor.
② The towers around the main building seem to stand vertically.
③ Artisans worked independently to build the Taj Mahal.
④ Mahal built the Taj in honor of his wife.

18 Choose the best expression for Ⓐ. [1.5점]

① color effect ② great tomb ③ optical trickery ④ Mumtaz Mahal

19 Which one is NOT TRUE? [2.5점]

① According to a story, the artisans went blind after completing the building.
② According to a tale, the Black Taj was built on the Yamuna.
③ There is no verified evidence of the Black Taj.
④ Shah Jahan spent time in Agra Fort.

[20-22] 192 words

Pepsi and Coca-Cola may be one of the most controversial drink debates of all time. A strong divide between diehard Coke drinkers and Pepsi enthusiasts has always existed. Yet, the two drinks are practically identical in every way from their caramel syrup color to their ingredients. Both sodas contain sodium, sugar, carbonated water, high fructose corn syrup, phosphoric acid, caffeine, and natural flavors.

Despite their numerous similarities, Pepsi and Coca-Cola still give people two vastly different flavor experiences, which explains why people prefer one over the other. In Blink, a book about decision making and thinking, by author and journalist, Malcolm Gladwell, he writes, "Pepsi is sweeter than Coke and is also characterized by a citrusy flavor burst, unlike the more raisiny-vanilla taste of Coke." In fact, a 12 ounce can of Pepsi contains one thing Coke does not — citric acid. In addition, Pepsi also has two more grams of sugar than Coke. These two subtle differences give Pepsi its sweet, citrus-like flavor that people either love or loathe. Plus, the additional 15 mg of sodium in a can of Coke may explain why it tastes more like a club soda with a Ⓐ_____ sweetness.

20 Choose the best title. [2점]

① The Benefits of Sodium and Sugar
② The Sweeter Pepsi
③ The Difference in Taste between Pepsi and Coca-Cola
④ The Ingredients of Soda

21 Which one is TRUE? [2점]

① Coca-Cola is more flavorful than Pepsi.
② Coca-Cola has more diehards than Pepsi does.
③ Coca-Cola is as sweet as Pepsi.
④ Coca-Cola enthusiasts do not love the citrusy flavor.

22 Choose the best expression for Ⓐ. [1.5점]

① strong ② toned-down ③ sour ④ citrus-like

[23-25] 171 words

Speaking after North Korea leader Kim Jong Un visited President Xi Jinping in Beijing this week, South Korea president Moon Jae-in said the next summit would include more detailed talks on how to officially end the Korean war and on sanctions relief for Pyongyang. "The second North Korea-US summit will firmly solidify peace on the Korean peninsula," he said in his new year press conference. The US president has said a meeting could take place this month or in February but talks have become deadlocked over what should come first: North Korean efforts to rein in its nuclear programme or the lifting of international sanctions against the communist state.

China has sought to cast itself as being Ⓐ_____ on the peninsula as Pyongyang's biggest trading partner, with Mr. Xi backing a second meeting, China's state news agency Xinhua reported. Mr. Xi said after Mr. Kim's visit: "China supports North Korea in continuing to Ⓑ_____ the denuclearisation of the peninsula and supports North Korea and the United States holding a summit and achieving results."

23 Which one is TRUE? [2점]

① The leaders of North Korea and the US are scheduled to meet this month.
② Kim Jong Un met Xi this week.
③ The US president is going to lift international sanctions against North Korea soon.
④ China dislikes the second meeting between North Korea and the US.

24 Choose the best title. [2점]

① Big Deal between China and North Korea
② The US-North Korea Summit Expected Soon
③ Kim's Visit to the US
④ Denuclearisation of the US and China

25 Choose the best expression for Ⓐ and Ⓑ. [2.5점]

① puppetry — dispatch to
② indispensable — dispatch to
③ puppetry — adhere to
④ indispensable — adhere to

[26-28] 140 words

The nature of acquiring languages is still quite mysterious. Children seem to have a natural inclination toward learning to speak from birth, and they are capable of quickly speaking intelligently. Three theories have been developed by researchers as to why children are able to learn a language with ease. These theories attempt to clarify some of the unfamiliar aspects of language acquisition. Ⓐ_____, they examine the behavior children exhibit during the various stages of speech development. The conditioning theory, the imitation theory, and the innateness theory all concentrate on the distinctive characteristics of this development.

No single theory is sufficient to completely explain the various characteristics of language acquisition, despite the fact that research on the subject is expanding. Ⓑ_____, when taken together, the conditioning, imitation, and innateness theories can provide some assistance in comprehending the subtleties of language development in children.

26 Which one CANNOT be inferred from the passage? [2점]

① One theory is enough to expound the acquisition of languages.
② Children learn languages effortlessly.
③ Researchers have not ceased studying language acquisition.
④ The ability to acquire languages is still enigmatic.

27 Choose the best word for Ⓐ and Ⓑ. [2.5점]

① Specifically — However
② Specifically — Despite
③ Consequently — However
④ Consequently — Despite

28 Choose the best title. [2점]

① The Mysterious Behavior of Children
② Learning to Speak
③ Various Stages of Child Development
④ Language Acquisition Can Lead to Maturity in Adults

[29-32] 257 words

Cotton farming became the main industry in the southern part of the United States just after the introduction of Eli Whitney's cotton gin in the South in 1793. Although the soil and climate in the South was ideal for growing cotton, there was one Ⓐ drawback. It took a long time to process after harvest, and the labor involved made it less profitable. Until the cotton gin, a device for removing the seeds from cotton fiber, was developed by Eli Whitney, it took one day to make a pound of thread. The cotton gin dramatically increased the amount of thread produced each day. With this new technology, it was possible to produce fifty pounds of thread in a single day. Whitney presented his cotton gin to a few of his friends. When they saw how efficient the machine was, they planted their fields with green seed cotton. Soon, there was a great demand for the machine, and the cotton industry Ⓑ took off.

A number of other factors contributed to the explosive growth of the cotton industry. Ample supply of cheap labor allowed for year-round production. In addition, workers in the cotton industry needed only minimal skills. This growth of the US cotton industry had a large Ⓒ impact on Britain. In 1830, for instance, the cotton industry Ⓓ accounted for approximately one-half of all British exports. However, they largely depended on America for the raw materials. Without the cotton gin and cotton farms in the southern US, a significant percentage of the British workforce would have been forced to find other jobs.

29 Which one is NOT TRUE? [2점]

① Whitney's cotton gin enabled Cotton farming to become the main industry in the American South.
② The American South had the ideal land and climate for growing cotton.
③ Whitney's cotton gin made it possible to produce thread fifty times a day as much as before.
④ Whitney first presented his cotton gin to a British cotton company.

30 Which one is NOT the element that contributed to the huge growth of the US cotton industry? [2점]

① Eli Whitney invented the cotton gin.
② The industry didn't strictly demand skillful laborers.
③ Huge amount of cheap labor could be supplied.
④ British exports increased explosively.

31 Which one does NOT appropriately replace Ⓐ~Ⓓ? [1.5점]

① Ⓐ — weakness ② Ⓑ — began ③ Ⓒ — affect ④ Ⓓ — made up

32 Choose the best topic. [2점]

① The contributors to the growth of the US cotton industry
② The consequences of the cotton gin
③ The close relationship between the US and British industries
④ The moderate growth of the cotton industry

[33-35] 153 words

Virtual reality and self-driving cars have been talked about a lot in recent years, and they will still be talked about this year. But these two technologies are still nascent or premature. Over the last two years, tech companies like Facebook, Google and Samsung have flooded the market with virtual reality headsets and plenty of software and games. Yet people have not exactly embraced the products. "The industry has been plagued by high-cost hardware, Ⓐ_____," said Martin Kabila, an analyst for the research firm eMarketer, in a recent post.

Self-driving cars are also still many years from becoming mainstream. Even though some companies have permits to test autonomous cars in California, Arizona and elsewhere, several of the leaders in the technology — such as Google and Amazon — have refrained from committing to a release date for self-driving vehicles. "There's going to be a lot of noise about automotive technology, Ⓑ_____ nothing distinct or specific," Kabila said.

33 Choose the best title. [2점]

① Still Long Way to Go for High-Techs
② Bright Future of High-Techs
③ A Good Area to Invest
④ Advantages of Virtual Reality and Autonomous Vehicle

34 Which one is NOT appropriate for Ⓐ? [2.5점]

① motion sickness
② a dearth of compelling content
③ a general lack of consumer interest
④ a series of convenient utilities

35 Choose the best word for Ⓑ. [1.5점]

① or ② but ③ so ④ then

[36-39] 153 words

Ⓐ They can also darken light that helps you see better. Ⓑ This superior lens technology was first discovered when NASA scientists looked to nature for a means to superior eye protection — specifically, by studying the eyes of eagles, known for their extreme visual acuity. Ⓒ But now, independent research conducted by scientists from NASA's Jet Propulsion Laboratory has brought forth ground-breaking technology to help protect human eyesight from the harmful effects of solar radiation light. Ⓓ Some ordinary sunglasses can obscure your vision by exposing your eyes to harmful UV rays, blue light, and reflective glare.

This discovery resulted in what is now known as Eagle Eyes. Eagle Eyes features the most advanced eye protection technology ever created. It offers triple-filter polarization to block 99.9% UVA and UVB as well as the added benefit of blue-light eye protection. Eagle Eyes is the only optic technology that Ⓔ_____ official recognition from the Space Certification Program for this remarkable technology.

36 Which one is the right order? [2.5점]

① Ⓓ — Ⓐ — Ⓒ — Ⓑ
② Ⓐ — Ⓑ — Ⓒ — Ⓓ
③ Ⓓ — Ⓐ — Ⓑ — Ⓒ
④ Ⓐ — Ⓑ — Ⓓ — Ⓒ

37 Choose the best topic. [2점]

① Splendid lens technology
② Solar radiation light
③ Blue-light protection
④ NASA scientists

38 Which one is TRUE? [2점]

① Some sunglasses can be dangerous.
② Eagles lack visual acuity.
③ Eagle Eyes completely blocks all light.
④ Blue light is more harmful than UV rays.

39 Which one is NOT appropriate for Ⓔ? [1.5점]

① has earned ② has garnered ③ has qualified ④ has attained

[40-43] 278 words

In most operating rooms today, there are two or three surgeons, an anesthesiologist, several nurses, and the patient. All of these people are needed for even a simple surgery. This situation, however, has begun to change. Surgical robots are beginning to replace several surgeons during one operation. In a few hospitals today, an operation requires only one surgeon, a computer, and a surgical robot. Looking even further into the future, the surgeon may not need to be there at all!

Robotic surgery has many advantages. First of all, it can be less traumatic for the patient. Ⓐ_____, during traditional heart surgery, the surgeon must open the patient's chest in order to perform the operation. Often, the opening, or incision, is about one foot long. However, with modern robotic surgery, called the da Vinci system, it's possible to make only three or four small incisions — about an inch each — instead. Because the incisions are so much smaller, the patients experience much less pain and bleeding. As a result, they can recover much faster. Furthermore, robotic surgery can be performed more quickly than traditional surgery, which means the surgeons are not so exhausted when they're finished.

During robotic surgery, the doctor controls the robotic "arms" using a computer. Currently, the doctor must be in the operating room with the patient for the robotic systems to react instantly to the doctor's hand movements. With further developments in this technology, the doctor will be able to control the robot from another room. Eventually, the doctor may not even have to be in the same hospital as the patient. This would allow surgeons to perform operations on patients miles away — even hundreds of miles!

40 Which one is NOT TRUE? [2점]

① Traditional surgery tend to need more people than robotic surgery.
② Under current robotic surgery, doctors have to control the robot using a computer.
③ Doctors can currently operate on patients who are far away through robotic surgery.
④ In the future, robot surgeons may perform operations without doctors.

41 Which is NOT the advantage of the da Vinci system? [2.5점]

① It may be quicker than the traditional surgery.
② It may cause patients less pain and time.
③ It allows doctors to make fewer incisions.
④ It allows doctors to feel less exhausted after the surgery.

42 Choose the best expression for Ⓐ. [1.5점]

① As the result ② Otherwise ③ For example ④ While

43 Choose the best title. [2점]

① The Future of Anesthesiology
② Strengths of Traditional Surgery
③ Medical Ethics of Robotic Surgery
④ Improving Surgery with Robotics

[44-46] 195 words

Scientists say there could be a reason why you don't remember what you ate for breakfast last week but can vividly describe your first day of kindergarten. Emotional meaning attached to a memory makes it stick in a way that everyday details can't. However, memories are not just about the past. They help us learn and make decisions about the future.

A memory is not a Ⓐ_____ entity but a unique pattern of activity that can shift or migrate between different parts of the brain. It is like a jigsaw puzzle that assembles throughout various areas of the brain, rather than a video clip stored as a whole file. Short-term memories do not "stick" in the synapse, and long-term memories might be distorted when they reassemble. One of the most important attributes of memory is our ability to learn. When we learn or recall information, we use memory to Ⓑ_____ the idea we have learned. Every time you eat, drive a car or read a book, you are remembering learned traits. New technology called optogenetics uses light beams to excite or silence a targeted group of neurons in the brain, helping scientists study and perhaps control memories.

44 Choose the best title. [2점]

① What is a Memory?
② Assembling Jigsaw Puzzles
③ Learning About the Future
④ Short-Term Memories

45 Which one is NOT TRUE? [2점]

① Optogenetics can help people remember.
② A memory is immovable.
③ Long-term memories can be malformed.
④ A memory is like a puzzle.

46 Choose the best expression for Ⓐ and Ⓑ. [2.5점]

① static — retrieve ② moving — retrieve
③ static — misplace ④ moving — misplace

[47-50] 257 words

As you get older, little growths called skin tags might start popping up on your body. You'll recognize them because they're thinner at the base and get wider at the top. They aren't painful or dangerous like cancerous moles, but there's a very good reason you'll want them removed. People have used all kinds of crazy methods to try removing skin tags on their own, says Dr. Rossi, MD, dermatologic surgeon. He's heard of people tying strings around them, burning them, trying to pick them off with their fingers, and even slamming books against them. A dermatologist, on the other hand, can snip away skin tags quickly and cleanly.

For one thing, dermatologists have sterile instruments, but using your own could lead to an infection. (Ⓐ) Plus, while dermatologists can use local anesthesia and have supplies to stop the blood, you could bleed uncontrollably with at-home methods. (Ⓑ) Even hospital medications claiming to dissolve the skin tags could be bad news, says Dr. Rossi. "You could burn the skin or make marks," he says. "There could be unintended consequences."

But there's an even bigger reason you should visit an expert. (Ⓒ) After dermatologists remove a growth, they'll look at it under a microscope. "There are things that look like skin tags but are cancerous," says Dr. Rossi. That doesn't mean you should freak out if you do find a skin tag. (Ⓓ) Plus, checking a skin tag is a "Ⓔ_____" to get your doctor to check the rest of your body for skin cancer and atypical or malignant growths, says Dr. Rossi.

47 Choose the best title. [2점]

① How to Handle Skin Tags
② The Consequences of Skin Tags
③ The Benefits of Home-Treatment of Skin Tags
④ The Cause of Skin Tags

48 Which one is NOT TRUE? [2점]

① Skin tags have a circular cone shape.
② People try a variety of ways to remove skin tags.
③ Most skin tags are cancerous.
④ It is good to get your body checked when a skin tag is found.

49 Choose the best place for the following. [2점]

Most will just be benign, but you won't know for sure until you've asked.

① Ⓐ ② Ⓑ ③ Ⓒ ④ Ⓓ

50 Choose the best expression for Ⓔ. [1.5점]

① good excuse
② dangerous process
③ useless method
④ necessary evil
